NEW  
COLOURS

**FOR MORE THAN  
150 YEARS**

## **GOOD WORK COMES FROM ACTION**

Best quality at affordable prices is just what Friedrich Küpper GmbH has guaranteed for more than 150 years! From the vice to the complete workshop equipment for your home or company – produced with the greatest care and high usage value. And a good system. Guaranteed.

High-quality German work – we know how to nurture and protect it. We make sure to contribute to it as well. The quality seal "Made in Germany" is a firm part of our corporate philosophy. Our workshop equipment is produced and packed with the greatest precision at our site in Berlingen (Eifel), thanks to state of the art machines. Regular quality inspections enable us as manufacturer to ensure a warranty period as long as 5 years in good conscience!

Every day, a strong team of qualified and committed people works to satisfy you with our service and reliability. In detail, for the greater whole and, of course, with passion and consideration. All of this is more than just empty words for us. We consider this a matter of course.

**MANAGEMENT IN THE FIFTH GENERATION**  
Peggy Küpper-Kies and Matthias Kies

**PRODUCTION TEAM BERLINGEN**

**POINT WELDING** Point welding pliers connect certain parts with a precise fit.

**EDGES** State of the art bending centres in use around the clock.

**PUNCHING TOOLS** High-quality punching tools ensure consistent quality.

**PUNCH** Our punches are fully automated. They can hold up to 36 different punching tools.

**COATING** Powder-coating protects the steel sheet and gives it a great look.

# OVERVIEW OF OUR SYSTEM

A system with sophisticated details and accessories

Workbenches in 4 widths

Our workbenches are available in four different widths. The matching model for each room.

Construction kit system

Choose your desired model from many combination options for the workbenches, no matter if you prefer drawers or lockable doors.

Smart corner solutions

Combined with the corner/connection element, a fitted cabinet can be pushed into the corner, so that it is filled out well.

Sophisticated detailed solution

Not only divisions for our drawers complement the range. Workshop carts and a side table on rollers are available as well.

# OUR EQUIPMENT DETAILS

## WORKTOP

Solid beech panel, 30 mm thick, rod-glued and finger-jointed, oil-treated for repelling dirt and protecting against distortion. FSC-certified wood. Not suitable for damp, unheated rooms (risk of warping)

## DRAWER

Drawers with guide rolls for comfortable extension and permanently smooth running, incl. extension lock. Carrying load 25 kg (distributed load).

## HANDLE

Massive handle of fibreglass-reinforced plastic with labelling unit ensure an overview and order at the workplace.

## DOORS

Lockable doors with spare key. Scratch-proof surface by powder-coated stove-enamel finish. Steel sheet with a thickness of up to 1 mm.

## HEIGHT-ADJUSTABLE FEET

Height-adjustable feet for compensation of ground irregularities (up to 2 cm).

### Wall cabinets in 6 widths

Available in six different widths. Stow your small parts and workshop accessories practically and cleanly in lockable cabinets.

### Perforated walls with detailed accessories

The perforated walls with the system holders permit quick access to the most common tools. An ideal supplement to the workbenches and wall cabinets.

### Skill corner solutions

Our corner wall cabinet will ideally fill the corner in your workshop. This enables optimum use for the corner area.

### Vices and accessories

Vices, mitre saws and various accessory items supplement our range and will help you quickly and effectively complete your work.

# ERGONOMIC ADJUSTMENT

Our workbenches (except for modular system and workbench with rollers) are also available at a work height of 95 or 100 cm! No "wobbly" screwed mechanics, but use of a higher side wall to guarantee stability and unchanged stress. Available with an additional drawer at the bottom upon request (both options are connected to a surcharge).

## Special height 95 cm

Item no. SH 95-2

Item no. SH 95-3

Item no. SH 95-4

## Special height 100 cm

Item no. SH 100-2

Item no. SH 100-3

Item no. SH 100-4

## Standard height 84 cm

## Special heights up to 100 cm

(-2, -3, -4 corresponds to the respective number of side walls)

# COLOUR VERSIONS

## Modern look

All workshop equipment items are available in the colour versions without any surcharge (exception: modular system: only available in black; 12780 only available in light grey-black).

The last digit of the item number corresponds to the colour code and informs about the colour combination.

## At least 3 years' availability guarantee

On old colour combinations (delivery time 4-6 weeks)

**Note:** Our colours are individual smooth, structured or hammer-blow paintwork with different degrees of glossiness. This is why they only correspond to a precise RAL shade to a degree. For re-painting, we recommend using a paint mixing service and choosing a matching paint and shade there (e.g. using colour cards or hue scans).

# POWDER COATING

Our items are applied with powder-coating. It has the following advantages as compared to conventional wet paint:

- + Solvent- and emission-free, making it particularly environmentally compatible
- + High material yield, up to 40 % more
- + Better surface quality, much more resilient to impact, scratching and abrasion
- + More chemical-resistant
- + Double layer application in one single workshop
- + Load-resistant at once after the surface cools off

This makes the powder-coating much more environmentally compatible and robust than wet paint. The epoxy resins also make the coating more flexible. This even permits bending of parts without the coating flaking off (e.g. in our drawer trays).

## DELIVERY & SERVICE

### Delivery time

Potentially in stock at the store, otherwise approx. 14 days, also in the colour combinations shown on the left. Approx. 4 weeks for assembled goods and special height.

### Delivery condition

Delivery disassembled, in a stable shipping box. Uncomplicated transport and very easy to place even if space is otherwise scarce.

### Assembly service

On request and against a surcharge, we offer assembly for all disassembled items as well. The goods are then assembled at the factory and shipped via a carrier.

## 7 TIPS FOR GOOD ORDER

### How to keep your workshop tidy

- + **Workbench grip for labelling**  
to avoid long searches
- + **Drawer divisions\***  
for well-structured sorting of the work materials
- + **Shelves\***  
for workbenches to divided the inner space
- + **Wall cabinets / slotted panels**  
with differently sized exposed boxes for storing small parts (model-dependent)
- + **Wall cabinet shelves\***  
height-adjustable as desired
- + **Perforated walls** (expansible in width as desired)  
to suspend tools
- + **Large choice of perforated wall accessories\***  
For the functional attachment of tools of all kinds

\*optionally available

## DRAWER INSERTS

Perfect order.  
Customized efficiency.

Our high-quality foam drawer inserts with tools bring structure to every Küpper workbench. Every tool is exactly where it belongs – perfectly fitted, securely stowed and immediately accessible. Whether screwdrivers, pliers or special tools: the individually designed cut-outs provide a clear overview and minimise search times.

The inserts are made of **robust, durable hard foam** – resistant to oils, greases and mechanical stress. **They are compatible with all standard drawer sizes in the Küpper system** (except for wide drawers, additional drawers for 240 workbenches and the modular system) and can be easily replaced or added as required.

2 × pegboard 70108, 120 × 60 cm, 12 standard metal hooks, 3 pieces, swivel stool 70008

## ACCESSORIES FOR WORKBENCHES

### Fitted cabinet as corner solution W 23 cm | H 80 cm | D 47 cm

2 drawers, for usage options see page 25

Item no. 12131  
Item no. 12133  
Item no. 12134  
Item no. 12138  
Item no. 12139

### Corner / connection element W 60 cm | D 60 cm

for workbenches incl. mounting material

Item no. 12060

### Tool and socket strip

Of stable steel sheet, with triple socket strip (IP 44), openings for nearly any tool type, can be screwed to the 120 cm worktop

Item no. 981-8

### Rear strips / protection strips

Beech wood laminate for tacking or screwing on

Item no. 977 60 cm, 1 pc.  
Item no. 978 120 cm, 1 pc.  
Item no. 979 170 cm, 1 pc.

### Drawer division

W 43.5 cm | H 6 cm | D 43 cm

for drawer (H. 12 cm)  
Plastic

Item no. 955

### Universal drawer division

for drawer (H. 12 cm)

18 boxes in 4 different sizes

Item no. 995

### Workshop stool

height-adjustable 54–79 cm

Gas pressure damper

Stable aluminium foot cross

Item no. 70008

### Shelf for storage space

for storage compartments with lockable doors, incl. mounting material

Item no. 945-8 46.9 × 44.3 cm

### Full beech panels

(matching the Küpper workshop series)

of solid beech wood, finger-jointed and laminated, oiled

Item no. 960: 600 × 600 × 30 mm  
Item no. 965: 1200 × 600 × 30 mm  
Item no. 970: 1700 × 600 × 30 mm  
Item no. 975: 2400 × 600 × 30 mm

### Worktop oil

Worktop / wood oil, raw linseed oil, cold-pressed, naturally clean without solvent and aromatics

Item no. 11250

## ACCESSORIES FOR WORKBENCHES

**Magnetic signs**  
**80 mm × 20 mm. Pack of 10**  
 For drawers, doors, shelves, cupboards – or anything with a magnetic surface! Writable with felt-tip pens, fibre-tip pens and ballpoint pens; wipeable with whiteboard markers.

**Item no. 982**

**Universal insertion box, red**  
**W 54 mm | H 63 mm | D 54 mm**  
 Polystyrene, highly impact resilient, food-safe

**Item no. 850**

**Fine-grooved rubber mats**  
**W 440 mm | H 3 mm | D 445 mm**  
 for drawer (H. 12 cm, workbenches). Creates a slipproof surface for your tools.

**Item no. 950**

**Universal insertion box, yellow**  
**W 54 mm | H 63 mm | D 108 mm**  
 Polystyrene, highly impact resilient, food-safe

**Item no. 851**

**Fine-grooved rubber mats**  
**W 955 mm | H 3 mm | D 415 mm**  
 for wide drawer (H. 12 cm, workbenches). Creates a slipproof surface for your tools.

**Item no. 952**

**Universal insertion box, blue**  
**W 108 mm | H 63 mm | D 108 mm**  
 Polystyrene, highly impact resilient, food-safe

**Item no. 853**

Rubber mat, cut to size

**Roll width of 100 cm**  
 Indicate your desired dimensions. We will cut the mats to size, also to protect the floor, worktop or similar. Precise desired size (e.g. 43.5 × 42.8 cm)!

**Item no. 956** Price in m<sup>2</sup>

**Universal insertion box, grey**  
**W 108 mm | H 63 mm | D 216 mm**  
 Polystyrene, highly impact resilient, food-safe

**Item no. 852**

Entire roll

**Roll width of 100 cm**  
 Width 100 cm, length 10 m, thickness 3 mm insulating, weather resistant, waterproof for indoor and outdoor use.

**Item no. 957-R** Price for the entire roll

**Surcharge for factory assembly**  
 Delivery takes place in the completely assembled condition (no setup on site).

**Item no. 901** workbenches 120, 170 cm and high cabinets

**Item no. 902** Wall cabinets, 60 cm workbenches, 12010 workshop trolley and 12130 corner cabinet

**Item no. 903** workbenches 240 cm, material cabinets with drawers.

# DRAWERS

## INNER DIMENSIONS OF THE DRAWERS

### a) Opening size drawer width (reach)

This size is only relevant if you want to store large pieces in the drawer, with outer sizes close to the inner drawer width (b).

### b) Inner drawer width

This size indicates the usable width of the storage space of the drawer.

### c) Opening size drawer length (reach)

This size is only relevant if you want to store large pieces in the drawer, with outer sizes close to the inner drawer length (d).

### d) Inner drawer length

This size indicates the usable length of the storage space of the drawer.

### e) Inner drawer height

The drawer height reflects the distance from the drawer bottom to the upper edge of the bent side wall. If you want to store pieces that are higher than the inner drawer height, the other dimensions of the parts to be stored must not exceed the dimensions a and c.

The item numbers marked with \* do not indicate the item number of the individual drawers, but the one of the item in which the drawer is installed.

# CORNER SOLUTIONS

## POSSIBLE APPLICATIONS OF THE KÜPPER FITTED CABINET AS A CORNER SOLUTION

Small protrusion

If you want to set up two of our workbenches at a 90°-angle to each other, you can generate a continuous work surface with the Küpper corner/connection element 12060. This leads to unused space below the connection element that can be sensibly supplemented by our fitted cabinet 12160.

Large protrusion

The many versions of our workbenches lead to different body widths with varying protrusions of the work tops. The body sizes are as follows:  
 For the 60-cm-workbench: 55 cm.  
 For 120 cm – 106 cm, for 170 cm – 157 cm and for 240 cm, these are 234 cm.  
 This causes the fitted cabinet 12130 not to be usable as a corner solution in all combinations.

Whether you can use a fitted cabinet with your desired combination or not is evident from the following table:

CORNER ELEMENT	WORKBENCH 2																						
	12090	12290	12390	12490	12190	12040	12050	12240	12080	12070	12120	12530	12150	12270	12870	12170	12520	12570	12030	12280	12380		
WORKBENCH 1	12090																						
	12290																						
	12390																						
	12490																						
	12190																						
	12040																						
	12050																						
	12240																						
	12080																						
	12070																						
	12120																						
	12530																						
	12150																						
	12270																						
	12870																						
	12170																						
	12520																						
	12570																						
	12030																						
	12280																						
	12380																						

For some workbench combinations, you need to fix the worktops with a lateral offset from the indication in the assembly instructions in order to create enough space for the fitted cabinet. Above illustration, for example, shows the combination of 12530 and 12150 where the worktops must be installed nearly flush with the body.

The fitted cabinet can be used without limitation
usable if the worktop is shifted laterally on the body
cannot be used

# INDIVIDUAL COMPONENTS PRINTING SERVICE

## New at Küpper

Thanks to our modern LED UV printing system, we can print your individual design directly onto our components. Your workshop furniture can thus be given a new lease of life according to your ideas. Whether it's the logo of your favourite club, car or motorbike brand or other fun motifs – we can print on any flat surface. Crisp details, vibrant colours and unusual designs will make your workshop furniture a real eye-catcher.

## We can print on that

Straight and flat parts up to 10 cm high and maximum 240 cm long x 100 cm wide

## How it works:

Once we have received your print template (by email, SD card, USB stick or upload), we will print the desired components. Individually. Creatively.

## Item no. 691:

Prints in sizes up to 0.25 m<sup>2</sup>

## Item no. 692:

Prints in sizes up to 1 m<sup>2</sup>

## Item no. 693:

Prints larger than 1 m<sup>2</sup>  
(up to max. 240 x 100 cm)

## Possible applications

- + **Company logo**  
The classic – probably the most common area of application. Your own company logo.
- + **Club logos**  
Expressing love for the club.
- + **Favourite photo**  
Whether it's holidays, your partner, pet or favourite place – even detailed photos can be printed without any problems.
- + **Checklists or content lists for employees**  
In large workshops/businesses with many people, it can be useful to print on the inside of the cabinet doors to better structure operations.
- + **AND MUCH MORE**

Our modern manufacturing plant has its production and warehouse in the beautiful Eifel region. We moved to this site in the Mid-1970s. The company was founded in Remscheid in 1869. The move to the Eifel region was driven by a need for more space.
