FOR MORE THAN 150 YEARS

GOOD WORK WITH BEST EFFECT

Best quality at affordable prices is just what Friedrich Küpper GmbH has guaranteed for more than 150 years! From the vice to the complete workshop equipment for your home or company – produced with the greatest care and high usage value. And a good system. Guaranteed.

High-quality German work – we know how to nurture and protect it. We make sure to contribute to it as well. The quality seal "Made in Germany" is a firm part of our corporate philosophy. Our workshop equipment is produced and packed with the greatest precision at our site in Berlingen (Eifel), thanks to state of the art machines. Regular quality inspections enable us as manufacturer to ensure a warranty period as long as 5 years in good conscience!

Every day, a strong team of qualified and committed people works to satisfy you with our service and reliability. In detail, for the greater whole and, of course, with passion and consideration. All of this is more than just empty words for us. We consider this a matter of course.

MANAGEMENT IN THE FIFTH GENERATION
Peggy Küpper-Kies and Matthias Kies

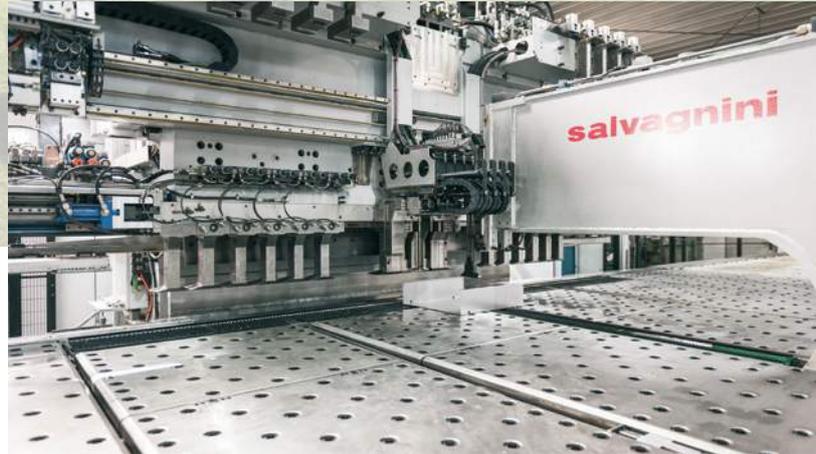

PRODUCTION TEAM BERLINGEN

POINT WELDING

Point welding pliers connect certain parts with a precise fit.

EDGES

State of the art bending centres in use around the clock.

PUNCHING TOOLS

High-quality punching tools ensure consistent quality.

PUNCH

Our punches are fully automated. They can hold up to 36 different punching tools.

COATING

Powder-coating protects the steel sheet and gives it a great look.

OVERVIEW OF OUR SYSTEM

A system with sophisticated details and accessories

Workbenches in 4 widths

Our workbenches are available in four different widths. The matching model for each room.

Construction kit system

Choose your desired model from many combination options for the workbenches, no matter if you prefer drawers or lockable doors.

Smart corner solutions

Combined with the corner/connection element, a fitted cabinet can be pushed into the corner, so that it is filled out well.

Sophisticated detailed solution

Not only divisions for our drawers complement the range. Workshop carts and a side table on rollers are available as well.

OUR EQUIPMENT DETAILS

WORKTOP

Solid beech panel, 30 mm thick, rod-glued and finger-jointed, oil-treated for repelling dirt and protecting against distortion. FSC-certified wood.

DRAWER

Drawers with guide rolls for comfortable extension and permanently smooth running, incl. extension lock. Carrying load 25 kg (distributed load). Partial extension with 80 %.

HANDLE

Massive handle of fibreglass-reinforced plastic with labelling unit ensure an overview and order at the workplace.

DOORS

Lockable doors with spare key. Scratch-proof surface by powder-coated stove-enamel finish. Steel sheet with a thickness of up to 1 mm.

HEIGHT-ADJUSTABLE FEET

Height-adjustable feet for compensation of ground irregularities (up to 2 cm).

Wall cabinets in 6 widths

Available in six different widths. Stow your small parts and workshop accessories practically and cleanly in lockable cabinets.

Perforated walls with detailed accessories

The perforated walls with the system holders permit quick access to the most common tools. An ideal supplement to the workbenches and wall cabinets.

Skill corner solutions

Our corner wall cabinet will ideally fill the corner in your workshop. This enables optimum use for the corner area.

Vices and accessories

Vices, mitre saws and various accessory items supplement our range and will help you quickly and effectively complete your work.

ERGONOMIC ADJUSTMENT

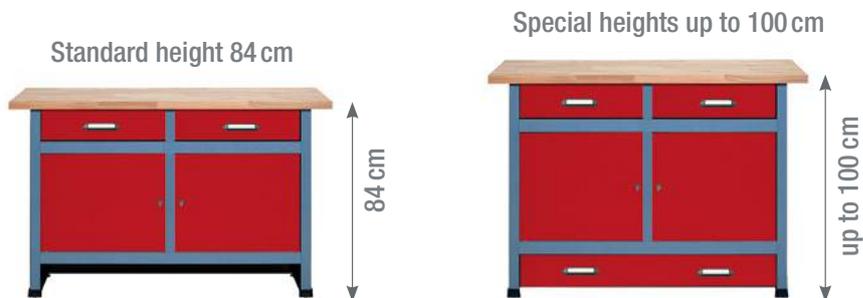

Our workbenches (except for modular system and workbench with rollers) are also available at a work height of 95 or 100 cm! No "wobbly" screwed mechanics, but use of a higher side wall to guarantee stability and unchanged stress. Available with an additional drawer at the bottom upon request (both options are connected to a surcharge).

Item no. SH 95

for special height 95 cm,
Surcharge per side wall

Item no. SH 100

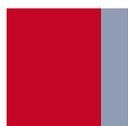

for special height 100 cm,
Surcharge per side wall

COLOUR VERSIONS

Colourful design

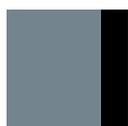

All items of the workshop equipment are available in the following colour versions without any surcharge (exception: modular system: only in ultramarine; workshop cart 12680: only in silver-black). The last digit of the item no. corresponds to the colour code and informs about the colour combination.

COLOUR CODE 2
Red (similar to RAL 3002)

COLOUR CODE 7
Ultramarine (RAL 5002)

COLOUR CODE 6
Beaten silver
(does not correspond to any RAL shade)

Note: Our colours are individual smooth, structured or hammer-blow paintwork with different degrees of glossiness. This is why they only correspond to a precise RAL shade to a degree. For wet painting, we recommend using a paint mixing service and choosing a matching paint and shade there (e.g. using colour cards or hue scans).

POWDER COATING

Our items are applied with powder-coating. It has the following advantages as compared to conventional wet paint:

- + Solvent- and emission-free, making it particularly environmentally compatible
- + High material yield, up to 40 % more
- + Better surface quality, much more resilient to impact, scratching and abrasion
- + More chemical-resistant
- + Double layer application in one single workshop
- + Load-resistant at once after the surface cools off

This makes the powder-coating much more environmentally compatible and robust than wet paint. The epoxy resins also make the coating more flexible. This even permits bending of parts without the coating flaking off (e.g. in our drawer trays).

DELIVERY & SERVICE

Delivery time

Potentially in stock at the store, otherwise approx. 14 days, also in the colour combinations shown on the left. Approx. 4 weeks for assembled goods and special height.

Delivery condition

Delivery disassembled, in a stable shipping box. Uncomplicated transport and very easy to place even if space is otherwise scarce.

Assembly service

On request and against a surcharge, we offer assembly for all disassembled items as well. The goods are then assembled at the factory and shipped via a carrier.

7 TIPS FOR GOOD ORDER

How to keep your workshop tidy

- + **Workbench grip for labelling**
to avoid long searches
- + **Drawer divisions***
for well-structured sorting of the work materials
- + **Shelves***
for workbenches to divided the inner space
- + **Wall cabinets / slotted panels**
with differently sized exposed boxes for storing small parts (model-dependent)
- + **Wall cabinet shelves***
height-adjustable as desired
- + **Perforated walls** (expansible in width as desired)
to suspend tools
- + **Large choice of perforated wall accessories***
for functional attachment of tools of any kind

*optionally available

Item no. 852

Entire roll

Roll width of 100 cm
 Width 100 cm, length 10 m, thickness 3 mm insulating, weather resistant, waterproof for indoor and outdoor use.

Item no. 957-R Price for the entire roll

Surcharge for factory assembly
 Delivery takes place in the completely assembled condition (no setup on site).

Item no. 901 workbenches 120, 170 cm and high cabinets

Item no. 902 wall cabinets and workbenches 60 cm

Item no. 903 workbenches 240 cm, material cabinets with drawers.

DRAWERS

INNER DIMENSIONS OF THE DRAWERS

a) Opening size drawer width (reach)

This size is only relevant if you want to store large pieces in the drawer, with outer sizes close to the inner drawer width (b).

b) Inner drawer width

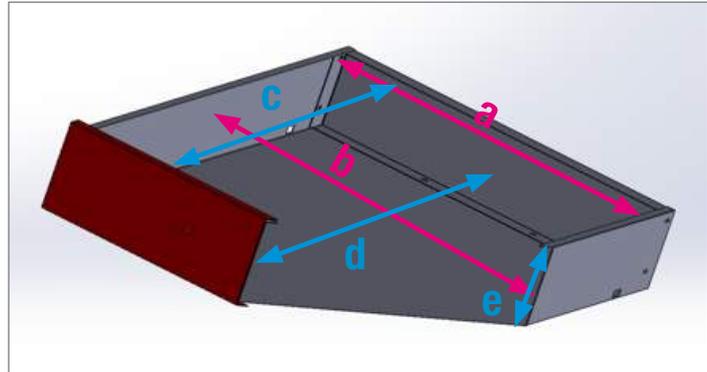

This size indicates the usable width of the storage space of the drawer.

c) Opening size drawer length (reach)

This size is only relevant if you want to store large pieces in the drawer, with outer sizes close to the inner drawer length (d).

d) Inner drawer length

This size indicates the usable length of the storage space of the drawer.

e) Inner drawer height

The drawer height reflects the distance from the drawer bottom to the upper edge of the bent side wall. If you want to store pieces that are higher than the inner drawer height, the other dimensions of the parts to be stored must not exceed the dimensions a and c.

CORNER SOLUTIONS

POSSIBLE APPLICATIONS OF THE KÜPPER FITTED CABINET AS A CORNER SOLUTION

Small protrusion

Large protrusion

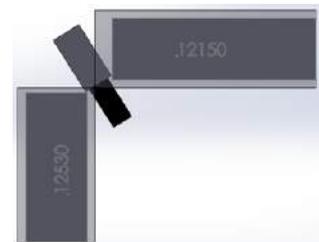

If you want to set up two of our workbenches at a 90°-angle to each other, you can generate a continuous work surface with the Küpper corner/connection element 12060. This leads to unused space below the connection element that can be sensibly supplemented by our fitted cabinet 12160.

The many versions of our workbenches lead to different body widths with varying protrusions of the work tops. The body sizes are as follows:
 For the 60-cm-workbench: 55 cm.
 For 120 cm – 106 cm, for 170 cm – 157 cm and for 240 cm, these are 233 cm.
 This causes the fitted cabinet 12160 not to be usable as a corner solution in all combinations.

Item no. 12160

Whether you can use a fitted cabinet with your desired combination or not is evident from the following table:

For some workbench combinations, you need to fix the worktops with a lateral offset from the indication in the assembly instructions in order to create enough space for the fitted cabinet. Above illustration, for example, shows the combination of 12530 and 12150 where the worktops must be installed nearly flush with the body.

CORNER ELEMENT	WORKBENCH 2
